SUMMARY

Biomedical Sciences Student | Motivated to Succeed | Globally-Minded

Is a driven, motivated student – able to overcome obstacles to success through critical reasoning and persistent effort. Will take any steps necessary to not only achieve a favorable outcome, but the best outcome possible.

Has notable experience in the medical field and industry through paid internships and volunteer work. Is passionate about improving the lives of others through the proliferation of new technologies.

Significant international experience. Is able to work effectively with a wide array of individuals. Fluent in Spanish and intermediate German.

WORK EXPERIENCE

Feb. 2019 - July 2019 Medical Volunteer
Global Medical Brigades, LLC – Texas A&M Chapter

Key Accomplishments:

- Participated in fundraising for TAMU Global Medical Brigade's Summer 2019 humanitarian trip to Honduras.
- Managed the triage of new patient arrivals and demonstrated knowledge of common medical conditions – referring patients to the required physician for their respective ailments.
- Performed blood pressure readings and visual diagnostics of patients while shadowing a physician.
- Transcribed patient information and prescriptions into a PMS system.
- Performed the sterilization of surgical instruments while working at an oral surgery station.
- Constructed sanitation facilities with a team of students for impoverished families, resulting in the completion of a holistic model of medical care paired with disease prevention to ensure long-term health improvements.

2017 - 2018 Business Intern
TeDan Surgical Innovations, LCC – Sugar Land, TX

Key Accomplishments:

- Produced formal research reports on leading Group Purchasing Organizations (GPOs).
- Presented sales forecasts relating to respective GPOs and provided cooperation recommendations based on projected growth trends.
- Performed the comparative analyses of product engineering blueprint revisions while embedded with the RA/QA department.
- Aided in the innovative design of a surgical retractor blade with endoscope and light source integration.
- Managed over 3000 product registrations with the FDA, while maintaining timely communication between RA/QA and company executives.
- Assisted in the marketing department with managing the company website back-end.
- Photoshopped over 100 newly released products for display online.
- Assisted in the transfer and reorganization of financial and product information to a modernized enterprise resource planning server.
- Assisted in the initial hardware installation and networking of desktop computers.
- Managed the reorganization of the company server room, including the sale and donation of disused computing hardware.

May 2015 - June 2015 Laboratory Intern
cabion Technologies GmbH – Ulm, Germany

Key Accomplishments:

- Assisted the lead physician with the distribution of customized immunotherapy treatments utilizing dendritic cells, leading to improved immune response and survival rate of cancer patients.
- Performed basic reagent preparation, in addition to the sterilization of lab equipment.
- Trained on how to properly perform a phlebotomy.
- Performed general office administration and clerical tasks.
